Projects

Partially True

Partially True is a browser based game where the computer chooses a number and you have to guess it. For each digit you enter, the computer will tell you which digit is in the number, which one is not, and which one is at the wrong place.

Tech: React JS, Tailwind CSS

Link: <https://partially-true.vercel.app>

Evil Simon

Evil Simon is a browser based/ web-based game, which derives its inspiration from a popular game called 'The Simon Says'. The difficulty of the game is increased so as to test and sharpen the memory skills of the player.

Tech: React JS, CSS

Link: <https://evil-simon.vercel.app>

G-12

G-12 is a Command Line based Python project, consisting of a set of fun games and IQ testing games.

Tech: Python, MySQL

Link: <https://github.com/Aditya-Pandey-GH/G-12>

Health Elevator

Health Elevator is a health-centric website that helps the users to search for nearby medical shops, and set reminders for medicines, which are sent on their WhatsApp. Also, the specially abled people can browse the site to know about the government schemes available for them.

Tech: ReactJS, Node.js, Express.js, MongoDB

Link: <https://github.com/Aditya-Pandey-GH/Health-Elevator>
