Projects

AZF Foods
At AZF foods, We're inspired by a true love for cooking and a dedication to delivering the finest, most authentic spices. The aim is to provide high-quality, sustainably sourced spices that bring every dish to life.
Tech: HTML, CSS, Javascript
Link: azffoods.com.au

Evil Simon
Evil Simon is a browser based/ web-based game, which derives its inspiration from a popular game called 'The Simon Says'. The difficulty of the game is increased so as to test and sharpen the memory skills of the player.
Tech: ReactJS, CSS
Link: evil-simon.vercel.app

Flappy Bird (Clone)
Flappy Bird (Clone) is a clone project of a well-known and popular game from 2013, known as Flappy Bird. This project aims to clone the same game, while increasing the difficulty slightly.
Tech: Unity, C#
Link: github.com/Aditya-Pandey-GH/Flappy-Bird-Clone/releases

G-12
G-12 is a Command Line based Python project, consisting of a set of fun games and IQ testing games.
Tech: Python, MySQL
Link: github.com/Aditya-Pandey-GH/G-12
